SVEZA UV

ULTRAVIOLET COATING IS SPECIAL MULTILAYERED COATING WITH UV-CURED VARNISH THAT PROTECTS THE PLYWOOD PANEL FROM DAMAGE WHILE ENSURING BEAUTIFUL APPEARANCE.

SVEZA UV is ready for cutting and making cabinets, drawers, and interior elements, helping to save time and labor for preparation.

The UV-cured varnish is available in different shades, colors, and gloss levels, while bringing out the natural grain beauty of birch wood.

SVEZA UV is certified as compliant with internationally recognized formaldehyde emissions regulations such as DIN EN ISO 12460-3, CARB ATCM, and EPA TSCA VI.

Applications: drawer sides, cabinet furniture, interior decoration.
